The screenshot shows the homepage of the Comprehensive TeX Archive Network (CTAN). The header features the CTAN logo and navigation links for Cover, Upload, Browse, and Search. A search bar is present at the top right. The main content area has a banner with a cartoon cat and the text "The Comprehensive TeX Archive Network". Below the banner, a summary states: "The Comprehensive TeX Archive Network (CTAN) is the central place for all kinds of material around TeX. CTAN has currently 4854 packages, 2240 contributors have contributed to it. Most of the packages are free and can be downloaded and used immediately." A "Search on CTAN" section provides instructions for full-text searching and links to an advanced search form. A "Did you know?" sidebar highlights a topic from the TeX Catalogue. The "Browse CTAN" section offers links to archive directories, lists of packages, topics, and contributors. A large graphic in the bottom right corner features the word "TeX" in a stylized font.

The screenshot shows the 'Settings' page of the CTAN portal. At the top, there's a navigation bar with 'Cover', 'Upload', 'Browse', 'Search', 'Location: CTAN Settings', and user links for 'Login', 'Join', 'Settings', and 'Help'. A cartoon dog is on the right.

Settings

Here you can configure the appearance of the CTAN portal (skinning) to fit to your personal taste. This feature can even be used without a community membership on the CTAN portal and without being logged in.

Skins

You are currently using the skin gray.
The skinning uses client side technologies only. This means that cookies and JavaScript need to be enabled for this feature to work properly. This also means that the skin is bound to the browser instance. If you use another computer then the skin is not preserved. Nevertheless other users are not affected by your settings.
You can select a skin from the list below. The selection is activated immediately and remains activated until changed.

Color-based Skins

These skins provide an responsive Web design. This means that the layout adapts itself to the space available in the browser window: images are suppressed or scaled and the two-column layout is abandoned on smaller devices.

gray

This skin tries to present the portal in a pleasing grayscale layout. Some graphics are used to support the appearance. But in general they are used sparsely.

gray with text logos

This skin tries to present the portal in a pleasing grayscale layout. Some graphics are used to support the appearance. But in general they are used sparsely. The logos are shown in text form, i.e. TeX instead of \TeX .

black

This skin tries to present the portal in a pleasing gray-scale layout with a black background. Some graphics are used to support the appearance. But in general they are used sparsely.

Local Settings

Apply hyphenation
 Show links to social networks

Language Selection

The language is negotiated with the browser and kept during the current session. This choice can be overwritten for the current session with the following selection.

Account Settings

You are not logged in. Thus no account settings are accessible.
Login first.

The screenshots show the following variations:

- Skin 1 (Top Left):** Standard light blue CTAN interface.
- Skin 2 (Top Right):** Dark mode version of the CTAN interface.
- Skin 3 (Bottom Left):** CTAN interface featuring a cartoon cat illustration.
- Skin 4 (Bottom Right):** CTAN interface featuring a large, stylized TEX logo.

Each screenshot displays the same basic content: the title "The Comprehensive TeX Archive Network", search and browse buttons, and a sidebar with "Did you know?" facts and "Search on CTAN" and "Browse CTAN" sections.

The screenshot shows the CTAN Comprehensive TeX Archive Network interface. The main title is "CTAN Comprehensive TeX Archive Network". Below it, a banner for "bibtool – A tool for manipulating BiBTeX files" is displayed. The banner features a cartoon illustration of a bear holding a book labeled "BiBTeX". The main content area describes the package's purpose: command line manipulation of BiBTeX files, including pretty-printing, syntactic checks, error recovery, semantic checks, sorting, merging, and generation of uniform reference keys. It also mentions using predefined rules or user specification to select references used in one publication, controlled rewriting of fields using regular expressions, macro expansion, and collecting statistics about data bases. On the left sidebar, there are links for Sources, Documentation, Home page, Version, License, Copyright, Maintainer, and Topics. The Documentation section lists a Manual, Quick Reference Card, C Programmer's Manual, and Readme. The Home page link points to [http://www.gerd-negebauer.de/software/TeX/BibTool](http://www.gerd-neugebauer.de/software/TeX/BibTool). The Version is listed as 2.58, and the Maintainer is Gerd Neugebauer. The Topics link is described as "utility for managing BiBTeX files". To the right of the main content, there is an oval-shaped callout box titled "Recommendations" containing links to other packages: ref2tex, alphabit, gmsbib, and bibbuild. Below the recommendations is a "Rating Summary" section with a 5-star rating and 2 votes.

The screenshot shows a Mozilla Firefox browser window displaying the CTAN package page for `bibtool`. The title bar reads "CTAN: tex-archive/biblio/bibtex/utils/bibtool - Mozilla Firefox". The main content area shows the package's documentation and download information.

Download the contents of this package in one zip archive (1.6k).

bibtool – A tool for manipulating BibTeX files

Command line manipulation of BibTeX files: Pretty-printing data bases; Syntactic checks with error recovery; Semantic checks. Sorting and merging of data bases; Generation of uniform reference keys according to predefined rules or according to user specification; Selecting references used in one publication which are found by analyzing an aux file; Controlled rewriting of fields utilising regular expressions to specify the rewriting rules; Macro (String) expansion to eliminate the need of extra string definitions; Collecting statistics about one or more data bases.

BibTool: A Tool for Manipulating BibTeX Data Bases

BibTeX provides an easy to use means to integrate citations and bibliographies into L^AT_EX documents. But the user is left alone with the management of the BibTeX files. The program BibTool is intended to fill this gap. BibTool allows the manipulation of BibTeX files which goes beyond the possibilities — and intentions — of BibTeX. The possibilities of BibTool include

- Pretty-printing BibTeX data bases adjustable by lots of parameters.
- Syntactic checks with error recovery superior to BibTeX and helpful error messages.
- Semantic checks can be specified by the user.

The screenshot shows a software interface for managing BibTeX files. On the left, there's a sidebar with links like 'Home page', 'Version 2.58', 'License GNU General Public License', 'Copyright 1995–2015 Gerd Neugebauer', 'Maintainer Gerd Neugebauer', and 'Topics utility for managing BibTeX files'. Below this is a large button labeled 'Download the contents of this package in one zip archive (1.6k)'.

A central panel displays 'Community Comments' from two users:

- Gerd Neugebauer (2015-07-18) - 5 stars, comment: sdfasddsf
- Roger Rabbit (2014-06-18) - 5 stars, comment: dasdasda

To the right, there are two callout boxes. One box, titled 'Rating Summary', shows a 5-star rating with 5 votes. The other box, titled 'My Rating', allows the user to rate the package as 'excellent' (5 stars) and provides a text area for comments, which is currently empty. It also includes fields for 'My depth of knowledge' (set to 'I am an expert for the package') and buttons for 'Save' and 'Delete'.
